Proactive monitoring

7

Microservices

.NET 8 across 4 AKS clusters

PLATFORMS UNDER MANAGEMENT

Platform	Stack	Scale
Mosadad (Insurance Recovery)	Azure AKS, Terraform, .NET 8, Angular 19, MongoDB, Redis	7 microservices, 2 frontends, 4 AKS clusters, 4 environments
ActionAI (AI Automation)	Azure AKS, Helm, Argo CD, GitHub Actions, APIM, Key Vault	1 microservice onboarded E2E, platform docs & cleanup

SCOPE OF DELIVERY

Infrastructure	Terraform modular IaC (AKS, APIM, App Service, Key Vault, networking, monitoring)	Kubernetes	Kustomize overlays, HPA per service, NGINX ingress, CSI secret provider
Security	WAF_v2, Azure Firewall, APIM rate limiting, Key Vault CSI, B2C/Entra ID	CI/CD	GitHub Actions DRY workflows, Docker → ACR → AKS → APIM auto-import
Monitoring	Grafana + Prometheus, App Insights APM, alert rules, availability tests	Data	MongoDB, Redis Cache, CosmosDB, Azure Blob Storage, B2C auth
GitOps	Argo CD, Helm umbrella chart, 1 microservice onboarded E2E (repo → CI/CD → Helm → Argo → APIM)	Documentation	Platform cleanup, READMEs, Confluence, architecture diagrams, handover readiness
