AHMED ELMAHDY

Platform/DevOps Engineer | Azure | AWS | Terraform | Kubernetes | CI/CD

New Cairo, Egypt | a.elmahdy.mail@gmail.com | GitHub: ahmed-el-mahdy

01559997794 | LinkedIn: ahmed-el-mahdy-007 | Portfolio: ahmed-el-mahdy.github.io

Professional Summary

Platform & DevOps Engineer focused on Azure and AWS, inherited-platform recovery, Terraform and Kubernetes operations. Delivered controlled environment and data migrations, secure Key Vault/CSI configuration, and repeatable GitHub Actions delivery. Combines workload-to-database troubleshooting with clear validation gates, rollback boundaries and operational documentation.

Core Skills

- **Cloud & Infrastructure:** Azure, AWS, Linux Admin, Cloud Environment Assessment, Platform Recovery
- **Infrastructure as Code:**Terraform, CloudFormation, Drift Analysis, Environment Alignment, TF State Management
- **Containers & Orchestration:** Docker, Kubernetes, Helm, Argo CD, AKS, Multi-Environment Deployments
- **CI/CD & Automation:** GitHub Actions, Jenkins, GitLab-to-GitHub Actions Migration, Bash, Python.
- **Identity & Security:** Azure Entra ID, RBAC, Key Vault, IAM roles, group-based access control, secret governance.
- **Observability & Operations:** Prometheus, Grafana, CloudWatch, Azure monitoring/logging, debugging, runbooks.
- **Cost & Governance:** Cost Management, right-sizing, tagging/governance, orphaned-resource, infrastructure assessment.
- **Documentation & Delivery:** Technical Reporting, Architecture Diagrams, Confluence, Remediation Planning, Stakeholder Communication

Professional Experience

➢ Platform/DevOps Engineer | Julfar Consultancy Services | Jan 2026 – Present

- Stabilized Azure/Terraform delivery for six AKS backends and two App Service portals.
- Delivered isolated staging2 backend, API and portal phases, retaining legacy staging for rollback.
- Replicated 91,724 blobs (12.24 GB) across three containers; verified exact name/size parity with read-only source access and no-delete target permissions.
- Verified an 18-key Key Vault/CSI secret contract and revoked temporary vault-scoped access after validation.
- Aligned six backend workflows across four branches and verified 18 promotion merge paths.
- Onboarded an ActionAI microservice through GitHub Actions, Helm, Argo CD and APIM; documented handovers.

➢ System Administrator | Julfar Consultancy Services | Oct 2021 – Dec 2025

- Administered on-premises and cloud-based systems, maintaining 99.9% uptime through proactive monitoring and incident response.
- Supported DevOps and development teams by configuring and maintaining CI/CD pipeline environments.
- Automated system maintenance, backups, and deployments using Bash and Python scripts.

- Assisted in AWS service management (EC2, IAM, VPC) and optimized resource utilization.
- Enhanced deployment reliability by reducing manual configuration errors by 20%.
- Collaborated with cross-functional teams to improve system scalability and uptime.

➢ DevOps Engineer Intern | DEPI – MCIT | May 2024 – Feb 2025 Remote

- Gained hands-on experience with AWS, Docker, Kubernetes, Terraform, Ansible, and Jenkins.
- Built and optimized CI/CD pipelines for application deployment and infrastructure automation.
- Managed infrastructure provisioning using Terraform and CloudFormation (IaC).
- Monitored application performance with Prometheus and Grafana integrated with CloudWatch.
- Worked in Agile teams to implement real-world DevOps practices and continuous improvement.

➢ AWS Cloud DevOps Nanodegree (MCIT & Udacity) | Nov 2022 – Apr 2023

- Designed and deployed AWS infrastructure using Terraform and CloudFormation.
- Built CI/CD pipelines for automated deployment to EC2 and S3.
- Integrated observability tools to ensure system reliability and performance.
- Applied Agile principles for team collaboration and project delivery.

➢ Infra & Systems Engineer | Shatta Company| Feb 2019 – Mar 2020

- Administered multi-OS environments, Proxmox clusters, VLANs, and firewalls to ensure system security.
- Implemented and managed VPN connections for secure multi-site connectivity.
- Enhanced infrastructure efficiency through proactive monitoring and maintenance.

Certifications

- Microsoft Identity and Access Administrator Associate (SC-300) 2025
- **AWS** Certified Solutions Architect Associate (2025)
- **AWS** Certified Cloud Practitioner (2025)

Professional development and training

- Azure Administrator Associate Training (2025)
- **CKA Certification Course —** KodeKloud **(2025)**
- Advanced Cloud DevOps **Nanodegree** from Udacity & MCIT (2023)
- **McKinsey** Forward Program (2025)

PROJECTS

- **Mosadad Recovery Claim Platform - Azure, Terraform, GitHub Actions, Kubernetes (2026)**
  Delivered six AKS backends and two App Service portals through isolated migration gates. Replicated 91,724 blobs and verified an 18-key CSI contract. Modernized MongoDB through separate Cosmos DB RU/serverless and DocumentDB vCore stages, resolving firewall egress on port 10260 and validating application reads. Published Terraform, Kustomize, reusable CI/CD and Argo CD/Helm reference examples on GitHub.

- **ActionAI Platform Enablement-Azure, GitHub Actions, Helm, Argo CD, APIM, Key Vault (2026)**
  Onboarded one microservice through repository setup, GitHub Actions, Helm, Argo CD and APIM across three environments. Strengthened Key Vault and Entra RBAC configuration and documented platform handovers.

- **Serverless Image Processing - AWS S3, Lambda (2025)**
  Built an S3/Lambda image-processing reference with configurable resizing and infrastructure examples.

- **N8N + Nginx + Ngrok Automation (2025)**
  Built containerized workflow automation with reverse proxy, SSL, and automated ngrok URL synchronization for webhook continuity.

- **DevOps CI/CD Project (2024)**
  Collaborated on a three-tier Angular/.NET application with Jenkins, Docker, Kubernetes, Terraform, Ansible and AWS EKS.

- **Shell-Scripted Database Management System – DEPI & MCIT (2024)**
  Developed a CLI-based DB management system with shell script for local data storage and query operations.

- **Udapeople CI/CD App – MCIT & Udacity (2023)**
  Built a CircleCI training pipeline with CloudFormation, Ansible, smoke checks, promotion and failure-time rollback hooks.

- **Infrastructure Automation – MCIT & Udacity (2022)**
  Automated AWS static site infrastructure using CloudFormation templates to ensure repeatable provisioning.

Education

- **Bachelor of Management Information Systems**-Delta Higher Institute of Computers-GPA **3.7 (2018)**
- **ITI Diploma** – System & Network Administration **(2019)**
