Professional Summary

Platform & DevOps Engineer delivering Azure and AWS infrastructure, Kubernetes operations and CI/CD modernization. Stabilizes inherited platforms through Terraform, secure delivery and layered troubleshooting. Delivered six-service migration phases, verified 91,724-file replication, and standardized multi-environment pipelines. Focuses on repeatable deployments, controlled change and operational handovers.

Core Skills

- **Cloud & Infrastructure:** Azure, AWS, Linux Admin, Cloud Environment Assessment, Platform Recovery
- **Infrastructure as Code:**Terraform, CloudFormation, Drift Analysis, Environment Alignment, TF State Management
- **Containers & Orchestration:** Docker, Kubernetes, Helm, Argo CD, AKS, Multi-Environment Deployments
- **CI/CD & Automation:** GitHub Actions, Jenkins, GitLab-to-GitHub Actions Migration, Bash, Python.
- **Identity & Security:** Azure Entra ID, RBAC, Key Vault, IAM roles, group-based access control, secret governance.
- **Observability & Operations:** Prometheus, Grafana, CloudWatch, Azure monitoring/logging, debugging, runbooks.
- **Cost & Governance:** Cost Management, right-sizing, tagging/governance, orphaned-resource, infrastructure assessment.
- **Documentation & Delivery:** Technical Reporting, Architecture Diagrams, Confluence, Remediation Planning, Stakeholder Communication

Professional Experience

➢ Platform/DevOps Engineer | Julfar Consultancy Services | Jan 2026 – Present

- Stabilized inherited Azure/Terraform configuration and state for six AKS backends and two App Service portals.
- Delivered isolated staging2 backend, API and portal phases with staged validation and a legacy rollback path.
- Engineered replication of 91,724 blobs (12.24 GB), verifying exact name/size parity across three containers.
- Secured an 18-key Key Vault/CSI contract, verified runtime coverage and revoked temporary vault access.
- Standardized six CI/CD pipelines across four branches; verified 18 promotion paths and repeatable APIM imports.
- Onboarded an ActionAI service through GitHub Actions, Helm, Argo CD and APIM across three environments.
- Documented gateway-to-pod-to-database dependencies, rollback boundaries and phased validation gates for reviewable, repeatable changes.
- Restored deny-by-default AKS-to-Storage access via a scoped subnet service endpoint, avoiding a broad VNet rewrite.

➢ System Administrator | Julfar Consultancy Services | Oct 2021 – Dec 2025

- Managed on-premises and cloud systems, maintaining 99.9% uptime through proactive monitoring and incident response.
- Configured and maintained CI/CD environments supporting repeatable builds and deployments for development teams.
- Automated maintenance, backups and deployments with Bash and Python to reduce manual intervention.
- Managed AWS EC2, IAM and VPC resources, troubleshooting access issues and optimizing utilization.
- Reduced manual configuration errors by 20% through repeatable automation and standardized procedures.
- Partnered with development and DevOps teams to troubleshoot deployment and infrastructure issues.

➢ DevOps Engineer Intern | DEPI – MCIT | May 2024 – Feb 2025 Remote

- Collaborated on a three-tier Angular/.NET and SQL Server application using Docker, Kubernetes and AWS.
- Built Jenkins stages for tests and image publication; maintained Kubernetes application manifests.
- Contributed Terraform-based AWS infrastructure and Ansible configuration for the team delivery.
- Configured Prometheus/Grafana monitoring to inspect application and infrastructure health.
- Delivered the project collaboratively in Agile sprints, documenting infrastructure and deployment workflows.

➢ AWS Cloud DevOps Nanodegree (MCIT & Udacity) | Nov 2022 – Apr 2023

- Provisioned repeatable AWS infrastructure using Terraform and CloudFormation.
- Built CircleCI stages for build/test, EC2/S3 deployment and smoke validation.
- Integrated monitoring and failure-time rollback hooks into the training delivery workflow.
- Collaborated with mentors and peers to deliver the cloud/DevOps graduation projects.

➢ Infra & Systems Engineer | Shatta Company| Feb 2019 – Mar 2020

- Administered multi-OS systems, Proxmox virtualization, VLANs and firewalls across operational environments.
- Implemented VPN connectivity for secure multi-site access and diagnosed network issues.
- Maintained infrastructure health through proactive monitoring and preventive maintenance.

Certifications

- Microsoft Identity and Access Administrator Associate (SC-300) 2025
- **AWS** Certified Solutions Architect Associate (2025)
- **AWS** Certified Cloud Practitioner (2025)

Professional development and training

- Azure Administrator Associate Training (2025)
- **CKA Certification Course —** KodeKloud **(2025)**
- Advanced Cloud DevOps **Nanodegree** from Udacity & MCIT (2023)
- **McKinsey** Forward Program (2025)

PROJECTS

- **Mosadad Recovery Claim Platform - Azure, Terraform, GitHub Actions, Kubernetes (2026)**
  Modernized the MongoDB-compatible data layer through separate Cosmos DB RU/serverless and DocumentDB vCore migrations. Diagnosed Azure Firewall egress blocking port 10260 and verified application reads after the secret cutover. Automated durable APIM Swagger publishing through five UI/document operations and a public-server rewrite; added a five-branch source-contract guard before cloud login. Published separate Terraform, Kustomize and delivery reference examples on GitHub.

- **ActionAI Platform Enablement-Azure, GitHub Actions, Helm, Argo CD, APIM, Key Vault (2026)**
  Delivered end-to-end onboarding for one microservice across three environments: repository, GitHub Actions build/deploy, Helm values, Argo CD synchronization and APIM exposure. Integrated Key Vault and Entra RBAC settings and produced operating documentation.

- **Serverless Image Processing - AWS S3, Lambda (2025)**
  Built an event-driven S3/Lambda image-resizing reference with configurable dimensions, Python processing and infrastructure templates.

- **N8N + Nginx + Ngrok Automation (2025)**
  Containerized n8n with Docker Compose, Nginx/TLS and automated ngrok URL synchronization; persisted workflow data across container updates.

- **DevOps CI/CD Project (2024)**
  Collaborative Angular/.NET/SQL Server delivery with Jenkins tests/image publication, Docker, Kubernetes manifests, Terraform-managed EKS and Ansible.

- **Shell-Scripted Database Management System – DEPI & MCIT (2024)**
  Built a Bash CLI for database/table CRUD, type validation and local file storage.

- **Udapeople CI/CD App – MCIT & Udacity (2023)**
  Built a CircleCI workflow covering CloudFormation, Ansible, migrations, smoke tests, CloudFront promotion and rollback hooks.

- **Infrastructure Automation – MCIT & Udacity (2022)**
  Built reusable CloudFormation network and server templates for repeatable AWS application infrastructure.

Education

- **Bachelor of Management Information Systems**-Delta Higher Institute of Computers-GPA **3.7 (2018)**
- **ITI Diploma** – System & Network Administration **(2019)**
